

EZHILARASI K

Data Analyst | Business & Data Analyst

Tamil Nadu, India | +91 7708440767 | ezhilarasisaraswathi@gmail.com | [linkedin.com/in/ezhilarasi-ks](https://www.linkedin.com/in/ezhilarasi-ks) | github.com/Ezhilarasi-123

PROFESSIONAL SUMMARY

Aspiring Data Analyst with hands-on experience in SQL, Excel, Power BI, Python, and data visualization. Skilled in data cleaning, analysis, dashboard development, trend identification, and generating actionable insights. Experienced in customer churn, sales, inventory, and business analytics projects with strong problem-solving and analytical skills.

CORE SKILLS

Data Analytics & BI: Power BI (DAX, Power Query), Tableau, Advanced Excel (Pivot Tables, VLOOKUP/XLOOKUP, Power Query), Dashboard Development, KPI Reporting, Data Visualization, Data Storytelling

Analytics Techniques: Data Cleaning & Transformation, Customer Analytics (Churn & Lifetime Value), Sales Analytics, Exploratory Data Analysis, Statistical Analysis, Machine Learning (Regression, Classification)

Programming & Database: SQL, MySQL, Relational Data Modeling, Python (Pandas, NumPy, Scikit-learn, Streamlit), Java

Tools & Platforms: Git, GitHub, Google Colab, Jupyter Notebook, MS Excel, PowerPoint, Word

Soft Skills: Communication & Teamwork, Analytical Thinking, Problem Solving, Time Management, Adaptability, Presentation & Public Speaking

PROFESSIONAL EXPERIENCE

Data Analytics Intern — Cybernaut Edtech Private Limited

May 18 2026 – Present

- Built 4+ interactive dashboards in Excel, SQL, Power BI, and Tableau, converting raw datasets into business-ready KPI reports that streamlined reporting turnaround for decision-making.
- Cleaned and transformed multi-source datasets across several analytics projects, improving data accuracy and the reliability of downstream reporting.
- Analyzed customer churn and lifetime-value datasets across 7,000+ records to identify high-risk segments, enabling more targeted retention decisions.
- Wrote SQL queries for data extraction and ad-hoc reporting, collaborating directly with mentors and cross-functional team members to meet reporting deadlines.

Data Science Intern — VCODEZ Innovation Ideas

June 2025

- Built a credit card fraud detection model in Python, covering data preprocessing, feature engineering, and model application on real transaction data.
- Analyzed transaction-level data to identify fraudulent activity patterns, improving prediction accuracy using core analytics techniques.
- Delivered one complete, real-world data science project end-to-end, strengthening applied Python and machine-learning skills relevant to analytics roles.

KEY PROJECTS

Customer Churn Prediction & Risk Analytics | Python, Pandas, Scikit-learn, Machine Learning, Streamlit

Scope: 7,043 customer records × 21 attributes

- Built an end-to-end machine learning system to predict customer churn probability using Logistic Regression, KNN, Random Forest, and Gradient Boosting, with preprocessing pipelines for numerical and categorical features.
- Engineered customer risk features and developed a Streamlit prediction system that classifies customers into Low, Medium, and High Churn Risk, providing churn probability, model comparison, feature importance, and actionable retention recommendations.

Student Performance Prediction | Python, Pandas, Scikit-learn, Machine Learning

Scope: 395 student records × 33 attributes (Mathematics dataset)

- Built a machine learning regression model to predict students' final academic performance (G3) using demographic, academic, study-time, attendance, and previous-grade features.
- Performed data preprocessing, categorical encoding, feature scaling, and correlation analysis, and compared Linear Regression and Decision Tree Regression using RMSE and R² evaluation metrics.

Customer Lifetime Value & Churn Risk Analytics | SQL, MySQL, Excel, Pivot Tables

Scope: 7,043 customer records × 21 attributes

- Built an end-to-end Excel dashboard analyzing customer lifetime value and churn behavior across 7,000+ customer records.
- Wrote SQL queries to identify high-risk customer segments through KPI analysis, translating findings into actionable retention recommendations.

Retail Sales Performance Dashboard | Power BI

Scope: 125M+ sales transactions × 10 columns

- Designed an interactive Power BI dashboard with dynamic filters and KPI cards to analyze sales trends and product performance at scale.
- Enabled faster, drill-down business reporting on a large-scale retail dataset, reducing time to surface trend-level insights.

Hospital Patient Records Analysis Dashboard | Tableau, Excel

Scope: 1,000 records × 10 attributes

- Built an interactive Tableau dashboard analyzing patient admissions, disease distribution, and department performance.
- Applied data storytelling techniques — KPI cards and dynamic filters — to communicate healthcare insights clearly to non-technical stakeholders.

E-Commerce Sales Analysis Dashboard | SQL, MySQL, Excel, Pivot Tables

Scope: 9,994 records × 21 attributes

- Built a Pivot Table and chart-based dashboard for sales trend, customer, and revenue analysis.
- Created KPI cards and business reports that improved reporting accuracy and turnaround time.

CrowdSync: Multi-Entrance Intelligent Crowd Monitoring System | Python, OpenCV, Power BI

- Developed an AI-based, computer-vision crowd monitoring system for real-time people counting across multiple entrances.
- Built a live Power BI dashboard to visualize real-time crowd analytics for operational monitoring.

IoT-Based Smart Plant Monitoring System | IoT, Sensors, Microcontroller

- Designed a real-time monitoring system tracking soil moisture, temperature, and humidity using IoT sensors.

EDUCATION

B.E., Electronics and Communication Engineering

Vivekanandha College of Engineering for Women, Namakkal | CGPA: 8.74 | 2022 – 2026

Higher Secondary Certificate (HSC)

Government Girls Higher Secondary School, Sivagiri | 76.16% | 2022

Secondary School Leaving Certificate (SSLC)

Government Girls Higher Secondary School, Sivagiri | 79.60% | 2020

CERTIFICATIONS

- Data Analytics — Cybernaut Edtech Pvt. Ltd.
- Java Programming — Cybernaut Edtech Pvt. Ltd.
- HTML — Spoken Tutorial
- Drone Technology Workshop
- Effective Presentation — HP LIFE

AWARDS & ACCOMPLISHMENTS

- Secured Third Rank in the Department of Electronics and Communication Engineering for academic excellence.
- Maintained a CGPA of 8.74 throughout the B.E. program.
- Participated in national-level symposiums at CIT, Coimbatore and Gnanamani College, Salem.
- Completed internship in Data Science and Doing Data Analytics, delivering 7+ real-world projects using SQL, Power BI, Tableau, Excel, Python, and Java.
